

## PRESS RELEASE

### Safe surfing and perfect protection of local networks in wireless environments

soft Xpansion presents *WLAN Expansion* - software for safe WLAN surfing and perfectly securing wireless networks

(Bochum, June 2007)

*WLAN Expansion* is a perfect and complete solution for safely surfing via a wireless Internet access and for conveniently protecting wireless networks. At the same time, the software helps to establish uninterrupted connection. Capacity tests and speed measurement allow easy positioning and adjustment of the WLAN components. Professional tips for defense against hackers, for encoding and key generator protection against unwanted visitors help to enjoy the journey into the wide spaces of the Internet.

The target group of *WLAN Expansion* is firstly made up by private PC users and company users who need to establish a safe network connection. Secondly, those who want get to the Internet at home, in the office or along the way with the help of WLAN. Especially sales representatives or people on a business trip who search for a hotspot close by with the help of the included hotspot database will profit from the functionality and security of *WLAN Expansion*.

The recommended retail price of *WLAN Expansion* is €29,95.

The program offers the following features:

- Search for available adaptors and wireless networks
- Connection to the selected network, setting up ad-hoc-networks
- Support of all encoding types: WPE, WPA, WPA-PSK, WPA2, WPA2-PSK
- Includes assistants for starting, positioning and data traffic management
- Sniffer Tool: tracks all available wireless networks and displays them in a list together with the most important information for comparative purposes
- Windows Tweaks Tool: changes internal operating system parameters which influence the efficiency and functionality of the network
- Hotspots database: contains hotspots from all over the world, powerful searching and filtering systems provide an optimal search
- Key Generator: helps to generate keys for maximum security
- Favorites Manager: controls frequently used networks, can store the favorites in a file and transfer them to another computer
- Graphic representation of networks, available adaptors, existing connections and data traffic
- Automatic notification about new networks
- "Black list" clears away the unnecessary networks nearby
- Network and adaptor report: illustrates the current program state
- Password protection of the program
- LiveUpdate - the program and the hotspots database always remain up-to-date

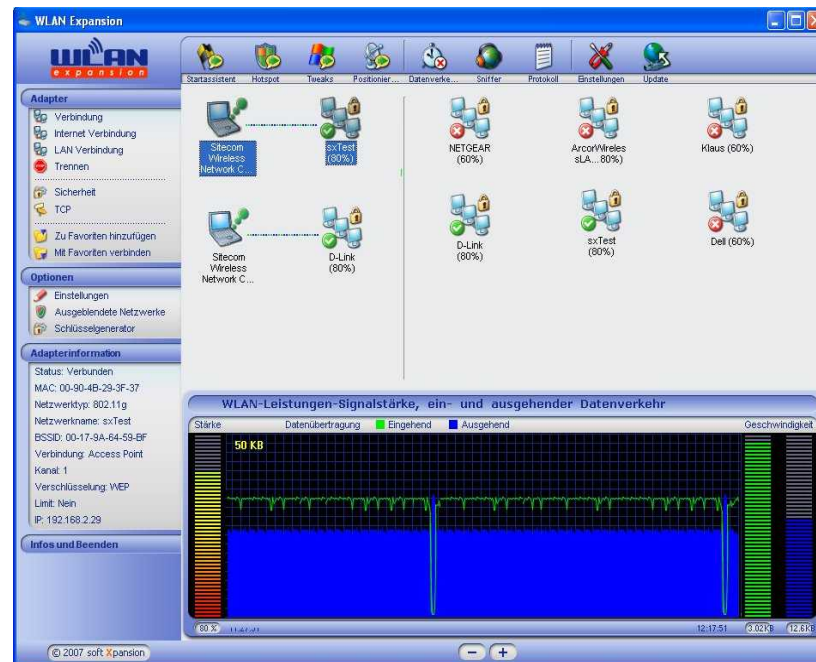

Highlights overview:

- Independent of adaptor type
- Includes hotspots database with approx. 50,000 hotspots worldwide
- Support of WPE, WPA, WPA-PSK, WPA2, WPA2-PSK
- For Internet and LAN access
- Sniffer Tool and notification about new networks

- Favorites Manager and transfer of the favorites to other devices
- Clear away unnecessary networks
- LiveUpdate and low resource requirements

#### System requirements:

Pentium III or higher, 128 MB RAM, 10 MB hard disk space, CD-ROM drive, mouse, WLAN-Adapter (internal or external), IEEE 802.11b/g standard, Windows Vista, XP, 2000, all service packs
