

## PRESS RELEASE

### Perfect PDF 6 Multiuser Licenses – More Comfort for Installation and Activation

(Bochum, Germany, June 9 2010) soft Xpansion has simplified the procedures of multiuser network installation and activation for its [Perfect PDF 6 software product family](#). This change also applies to Terminal Server and Citrix environments.

Firstly, **client-side activation of the software may be done on a centralized basis** now. This means that activation is performed on only one computer for all clients, namely on the server. It is no longer necessary to run through the activation procedure on each client (workstation) separately. With a multiuser license version, the system administrator may centrally manage the client setups up to the maximum amount included in the license. The **activation is hardware-based**, so the license key is tied to the server's hardware components, which makes it impossible to use the same license key on another computer at the same time.

The multiuser license is set up as a system service ("soft Xpansion Local Network License") on the server (any Windows computer) by the system administrator. The status and settings of the service are monitored and changed in a web browser via http protocol.

Secondly, installation on the client computers may now also be run in the background, in a **silent mode**. This means that the client users do not see any installation windows and no reboot of their computers is necessary.

For all [Perfect PDF 6 family members](#), a multiuser license quantity scale applies. It offers **attractive volume discounts, even for smallest networks** (starting with two clients). The products are available online in the [soft Xpansion webshop](#). A [comparative overview](#) of the software family members on the Internet (see the bottom of the web page) helps to decide which edition is the right one for various specific tasks.

[Perfect PDF 6 Premium](#) is the edition that includes the richest set of features within the product family. For example, the download

version for five clients is available for 240,- Euros (297,- US Dollars or 205,- British Pounds).

Dr. Juri Stern, Managing Director at soft Xpansion, points out: "With the introduction of centralized activation and silent mode for multiuser licenses, we aim at making the setup of our PDF software easier. Corporate customer surveys have revealed that most of our users are satisfied with the set of PDF features and with the conversion results, but many wish to be able to setup the software in their networks more quickly and comfortably. Therefore we have worked on improving this part, and the results are obvious."

**TRIAL VERSIONS AND DETAILS**

The soft Xpansion web site includes details about the various Perfect PDF 6 editions and about their functionality on the [product page](#). Trial versions of the single user versions and a [description](#) on how the multiuser editions are set up may be downloaded there as well. A multiuser trial version for ten clients is available on [request](#) from the soft Xpansion sales department.

**SYSTEM REQUIREMENTS**

Pentium IV, 512+ MB RAM, 50 MB of hard disc space, Windows 7/Vista/XP (32- or 64-bit versions), mouse. For the integration into Microsoft Office: Office 2010/2007/2003. For the integration into Internet Explorer: Internet Explorer 6 or higher. In order to be able to perform the obligatory activation process, access to the Internet and/or an e-mail address is required. The trials versions can be used without activation.

**DISTRIBUTION OF READY PDF FILES IN COMPANY NETWORKS: PDF RENDER CENTER**

Another product developed by soft Xpansion, [PDF Render Center](#), is not only apt to centrally convert content into PDFs on a server, but also includes various ways to distribute the ready PDF files automatically within and outside company networks. This functionality also makes PDF Render Center an interesting conversion solution for the integration into document management systems of all sizes.

**ABOUT SOFT XPANSION**

soft Xpansion is a globally active, international team of software writers, developers, screen designers, engineers and product managers. The company was founded in 1995 and is headquartered in Bochum, Germany. In the past 15 years, more than 150 software products have been published in more than 200 different editions.
